ecoscreen®

how to choose the right fabric

SunProject™'s EcoScreen® Collection has a fabric choice designed for all your needs and solutions

solar protection and view

Where good solar protection is required while maintaining a good view to the outside choose:

ES-8600

Available in 9 designer colours. A thin subtle sheer design lets the natural light enter your space without compromising glare or unwanted heat. Its soft warm texture compliments and enhances the décor in your home.

privacy

Where privacy is required choose:

ES-8500P

A thin yet tight weave construction provides privacy from the outside while allowing natural diffused light to enter your room minimizing the need for artificial light. Available in 9 matching colours to ES-8600 fabrics. In tandem, they are a perfect match when one room requires privacy or soft diffused light while the other may require the need to maintaining beautiful views.

heat and energy efficiency

Where heat is a concern choose:

ES-8400M

ES-8400M with highly reflective metallized backing is designed to improve and reflect solar energy, while at the same time providing an excellent view to the outside. Due to the highly reflective nature, this fabric is an optimal solution to help reduce solar heat gain and for light control. As with all our EcoScreen collection we provide the same 9 matching colours.

unified colour and heat

Where colour to the exterior and heat is a concern choose:

ES-8700D

With its specially designed two coloured fabric construction having a light colour to the exterior for uniformity and a warmer more subtle colour in the interior. This wonderful textured weave provides a feeling of intimate warmth to any room.

room darkening - opaque

Where room darkening and opacity is required choose:

EB-700

The EB-700 has unique decorative colours and the look and feel of an elegant rich fabric.

durable

smooth

effortless

finger lift
control

Lite-Lift®

a state of the art
effortless lift system

- Lite-Lift® provides a smooth constant lift of medium to large shades with effortless control.
- Lite-Lift® allows you to pull down the roller shade by the bottom bar without damaging or stripping the system.
- Lite-Lift® alleviates stress on the chain and avoids its breakage eliminating the major cause of maintenance associated with chain operated shades.
- Lite-Lift® mechanism cannot be stripped or damaged. It virtually lasts forever!

expertise

know-how

reliability

experience

advanced automated systems

SunProject™'s experienced personnel makes automation simple. Enjoy total home control with just a touch of a button.

- Our experienced authorized dealers backed by our support team will make it simple for you to automate your home. We will plan, specify, install, and service our shading systems to exceed your expectations.
- All our state of the art motors and control systems are easily integrated with all audio-visual, lighting control, and any home automation systems on the market.
- We will support your projects from beginning to completion.

deko® & tekno® options

Deko® Open Roll

- Deko® Open roll is a perfect solution for any modern look.
- Deko® Open roll is offered in two different sizes to accommodate small to large windows.
- Deko® Open roll comes with an assembled shade holder for the ease of installation.

Deko® S-70

- The slim-line square cassette is available in white, ivory, black, clear anodized or bronze colours.
- We offer a regular or reverse roll style in two different cassette sizes.
- Unique hidden safety lock bracket system.

Deko® R-70

- The slim-line round cassette is available in white, ivory, black, clear anodized or bronze colours.
- Elegant fabric wrap is optional.
- Unique hidden safety lock bracket system.

Tekno® 70

- The slim-line contemporary design of Tekno® 70 cassette compliments any decor.
- Tekno® 70 cassette design is available in white, ivory, black, clear anodized or bronze colours.
- Side channel options are available for room darkening solutions.

Our roller shades are available in our patented **Lite-Lift®** effortless lift system and in a wide range of motorization options.

All shades are factory assembled and tested before being shipped.

alumatek®

Alumatek® shutters combine the great style with durability of advanced modern-day materials. Experience a stunning look and make a statement with unparalleled elegance and design.

- Choose from white or off-white linen, or be original and go with our special metal finishes: anodized silver and anodized bronze.
- Available in 2 ½ and 3 ½ louvers.
- Alumatek® has the largest panel capability in the industry - up to 60" width and 120" height.
- Alumatek® will never chip, crack, peel or rust.
- The surface finish has a high humidity tolerance.
- Suited for exterior applications.
- Unlike other shutter systems that require a center rail, our louver divider pivots to align with the top of bottom sections.
- Alumatek® does not build up a static charge like vinyl or poly resin shutters. Therefore, the louver panels do not attract dust.
- Enjoy the best warranty in the industry - 20 year "common sense" warranty.

unparalleled elegance and design

SunProject™ offers advanced European designed exterior shading systems, including roller shading systems, (EVB) exterior venetian blinds and louver systems to accommodate a home of any style.

- Our exterior shades dramatically reduce heat gain and control glare.
- Exterior shading systems significantly reduce air conditioning costs.
- Fully automated exterior roller shading systems are controlled by sun and wind sensors.
- The exterior-rated products withstand any weather conditions.
